### **DETAILED ACTION**

1. This office action is in response to the response filed August 24, 2006.

Accordingly, a certified translation of the priority Japanese Application 2001-029814 filed on February 6, 2001 was submitted in order to perfect priority over US 6,836,308 B2 to Sawasaki et al..

2. Claims 1-12 and 17-33 were cancelled. Currently, claims 13-16 are pending in this application.

### ***Allowable Subject Matter***

3. Claims 13-16 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed.

Specifically, re claim 13, none of the prior art of record discloses, in combination with other limitations as claimed, a liquid crystal display device comprising a first orientation control element extending in a nonparallel direction relative to an extending direction of an edge of said pixel electrode, and a second orientation control element extending from said first orientation element in a parallel direction relative to an extending direction of said edge provided on at least one of said first and second substrates,

wherein said second orientation control element has a constant width, and said width is smaller than a width of said first orientation control element.

The most relevant reference, US 6,567,144 B1 to Kim et al. (Kim), fails to disclose or suggest said second orientation control element has a constant width, and

said width is smaller than a width of said first orientation control element. As shown in Figs. 6A, 6B and 7, Kim discloses a first orientation control element 17 extending in a nonparallel direction relative to an extending direction of an edge 19 of the pixel electrode 20, and a second orientation control element 171 extending from said first orientation element in a parallel direction relative to an extending direction of said edge 19 provided on the second substrate 100. However, said second orientation control element does not have a constant width which is smaller than a width of said first orientation control element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
